

INNOVATION: KIKO TECHNOLOGY ENERGIZED WATER

Our big collaboration with Kiko Technology to replace the traditional chemical and filtration methods with green and environmentally friendly solution. Plus the improved quality of the energized water improves housekeeping time (i.e. easier to clean windows, bathrooms, tiles) / washes pesticides off vegetables and fruits in seconds / lengthens the shelf life of perishables / less time to cook stock soup / less filters and nozzle replacements (nil scale will allow this) / and improve energy efficiency and fuel/electricity costs.

ENERGY SAVING: OFFICE CARPOOL

We are delights to introduce our one and only 'Carpool' team from Accounting and Sales Departments. All of them live near by each others and decide that they should run a carpool together. "At first we only think about the saving, but it turns out to be that we are really enjoy all of our conversations and the fun that we hadn't anticipated."

ENERGY SAVING: CAR FREE EMPLOYEE

Khun Moo, proud member of our Housekeeping team, takes her bicycle to work everyday. She said "All I can see from taking bicycle to work are all plus! I can take exercise everyday, save a lot of money. No traffic, no pollution are created from me and bit by bit I'm saving the world!"

EDUCATION: HOME-GROWN VEGETABLE PROJECT

By building a small organic home-grown vegetable garden at the hotel, we harvest all vegetables and use them in our staff canteen. We also provide a know-how to our associates and educate them that growing your own vegetables and herbs is healthy, economical, good for the environment and fun.
